

AMT Thanks You !

2010 is just around the corner, and it is time to look back on the year 2009; we all felt the pinch of the economic crisis which still remains; although in the 2nd half of the year, the economy started to gain life a little. Whether to sign the ECFA (Economic Cooperation Framework Agreement), which is the economic cooperation affairs between Taiwan and mainland China, or not will be a deep influence on Taiwan economy in the next decade. Global warming is increasingly more critical day by day, violent climate change is causing natural disaster worldwide; energy saving and carbon reduction are everyone's responsibility, the globe can not wait anymore.

Confronted by the challenges of the economy and the environment, AMT team still holds on to the spirit "to satisfy customer, to keep improving, to seek solutions"; we are committed to continue to develop new touch technologies. Thus far, we have completed various new touch products such as Multi-Finger (MF) Touch Total Solution; Low Reflective Glass-Film-Glass (GFG) Touch Screen; Resistive Touch Window; and Projected Capacitive Input (PCI) Touch Solution. AMT thank you again for believing in and choosing to work with us; management takes this opportunity to say THANK YOU also to each and every member of the AMT TEAM, and to our valued partners and distributors for their hard work and cooperation and all-out support; thus, even during difficult times like this, we are still able to continue to improve and to develop new products.

Our mission is to provide total touch solutions to customers; we listened to customers and the market demands to develop all the above-mentioned products. We have more new products being developed for launch next year; our goal is to allow customer's products to become more competitive after using AMT touch screen kits.

AMT is also sparing no efforts on environmental protection and corporate social responsibility (CSR). We changed to new packaging for the large touch screens, the new packaging materials are recyclable and designed to be environmentally friendly. All AMT staff is taking unified action in energy conservation and carbon reduction programs. Besides these, we have been participating in carrying out our social responsibilities. We provide daily lunch to aid remote regions' poor and impoverished students, give aids in cash and kinds to poor families to tide them over during this difficult time; donated medical equipments to hospitals in the remote regions of Taiwan; and in our own AMT neighborhood, we have helped facilitated street lights for the whole district, and fostered close communications with the chiefs of the 8 villages here in Shen-Kheng Hsiang on helping the poor families in each of their villages.

We thank you for your support and encouragement; your comments and suggestions drive us to move forward continuously. In the coming 2010, AMT team will continue to provide "Quality, Technology, Service" to all .

AMT wishes you a Happy New Year.
